Table of Content

1 Introduction 10

2 Knowledge Management 19

2.1 What is Knowledge? 19

2.2 Knowledge Management Concepts 24

2.2.1 KM based on Business Process Models 24

2.2.2 Semantic Networks and Ontologies 25

2.2.3 Standards 28

2.2.4 Search- and Retrieval-Methods 40

2.3 Knowledge Management Systems 54

2.3.1 Technologies and Applications forming a KMS 54

2.3.2 Review of Some KMS 64

2.4 Summary and Relevance for the Thesis 73

3 Issues in Company Knowledge Management – Status and Lessons Learned 74

3.1 Knowledge Management Trends 74

3.2 Contact- and Knowledge Exchange Platforms 81

3.2.1 Brief Description of Examined Platforms 82

3.2.2 Analysis of Contact- and Knowledge Platform Examination 85

3.3 User Research Knowledge Management Experiences and Needs 92

3.3.1 Profile of Attendees 92

3.3.2 Evaluation of a Used Knowledge Management System 94

3.3.3 Requirements for a Hypothetical Knowledge Management System 95

3.3.4 Personal Comments 99

3.3.5 Résumé 105

3.4 Problems of Traditional KM / Findings in Literature 101

3.5 Lessons Learned: Requirements for KM Success 112

4 A Novel Knowledge Broker Network (KBN) 117

4.1 Principle / Strategy 117

4.2 Man-Machine-Cooperation 124

4.2.1 KMS and Knowledge Structure 124

4.2.2 Employee Profiles 125

4.2.3 Automated Update Processes for the Maintenance of the Knowledge Network 127

4.2.4 Search Functionality 129

4.2.5 Search Results Restrictions and Ranking of Experts 130

4.2.6 Supporting Complex Requests / Querying Multiple Experts 133

4.2.7 When to Contact a Personal Knowledge Broker 133

4.3 Personalisation 135

4.3.1 Personalisation Concept 135

4.3.2 How Personalisation Works in the KBN Portal 138

4.4 Communities 140

4.4.1 Communities of Practice 140

4.4.2 Management of Employee's Relationships 142

4.4.3 Identify Communities of Practice based on Employee's Relationships 144

4.4.4 Organisational Support of Communities of Practice 146

4.4.5 Asking Communities of Practice 146

4.5 Search Assistance Algorithm (SAA) 148

4.5.1 Calculating Additional Hints by Personalised Knowledge Retrieval 148

4.5.2 Introduction to SAA 148

4.5.3 Extensions of SAA for Practical Use 154

4.6 Integration of Internet Resources 159
4.6.1 Integration of Semantic Web Resources 159
4.6.2 Integration of Documents or single Pages found in the Web 159
4.6.3 Integration of entire Web Sites 159
4.6.4 Links to Information Items vs. Copies of Information Items 160
4.6.5 Trust on External Resources 160
4.6.6 Issues on including External Resources in a Company Knowledge Base 160

4.7 Privacy Concept 162

4.8 Connecting KMS Islands Using the KB Network 164

4.9 KBN Portal Prototype 165

4.10 Search Assistant Algorithm (SAA) Infrastructure Prototype 176

4.11 Who is qualified for the role "Knowledge Broker"? 207

4.12 Summary 208

5 Other Applications of the Man-Machine-Cooperation-Principle 212

5.1 IT Assistance for Small and Medium Enterprises 212

5.2 Personal Assistance Network (PAN) 218

5.3 Information Broker Network (IBN) 220

5.4 Information Broker Prototype 228

5.5 Summary 237

6 Conclusions & Outlook 238

Literature 249

Appendices **278**

A Publications

B Knowledge Management Technologies

B.1 XML - based Standards B-1

B.1.1 eXtensible Markup Language XML B-1
B.1.2 XSL (eXtensible Style Language) B-2
B.1.3 XPath (XML Path Language) B-4
B.1.4 XLink B-5

B.2 Topic Maps B-10

B.3 Search- and Retrieval-Method Examples B-12

C Details to Knowledge Management Trend Studies

C.1 Study Nohr 2000 ..... C-1

C.2 Study unicmind 2001 ..... C-3

C.3 Study Inst. f. e-Management 2001 ..... C-4

C.4 Study Ohle 2003 ..... C-5

C.5 Study Koeder & Rohleder 2004 ..... C-9

C.6 Study Linde 2005 ..... C-10

D Details to Contact- and Knowledge Exchange Platforms

D.1 Functions of Examined Platforms D-1

D.2 Search for Resources D-3

D.3 Search for Experts D-4

E GUI Elements of the KBN Portal

F Comparison of Functionality between KBN concept and KMS

G List of Figures
